

Words from patient, Shirley S.

Testimonials help me because my doctor knows how I progress in my every day living. I walk better, sleep better, and do more in my life like carpet bowl and swim. I wish for everyone it was part of our health system. It has really helped me in my lifestyle.

I believe testimonials are important for patients because some of my friends have never been to a chiropractor after hearing a few bad stories. If they saw slide for listened to the speakers I think they would feel different.
